

Feel his rage.
Hear his pain.
Count his split ends.

Razor-sharp 1080p resolution. Lossless, high-resolution 7.1 surround sound. Advanced movie-viewing features, interactivity, and extras. Over three hours of mind-blowing movie-watching excitement on one disc. Who needs more than that?

This isn't someday. This is now. This is HD DVD.

The reviews are in.

“It delivered some of the best video I’ve ever seen on a prerecorded consumer format. Many shots are breathtaking.”

—Peter M. Bracke, *High-Def Digest*

“Even high-definition TV doesn’t look this good; the amount of information HD DVD pumps to your screen dwarfs what you get from satellite or cable.”

—David Pogue, *The New York Times*

“The differences between the first six HD DVD movies that were released and their DVD counterparts were nothing short of astonishing... I’d say that HD DVD is a giant success.”

—*Sound & Vision* magazine

Being first to market was great, but being the best in the market is even better.
